

1. Biographical and Personal Information

Donald E. Knuth, born January 10, 1938, Milwaukee, Wisconsin; U. S. citizen.
Chinese name 高德纳 (pronounced Gāo Dénà or Ko Tokuno or Go Deoknab).
Married to Nancy Jill Carter [高精兰] (b. July 15, 1939), June 24, 1961.
Children: John Martin (b. July 21, 1965), Jennifer Sierra (b. December 12, 1966).

2. Academic History

Case Institute of Technology, September 1956–June 1960; B.S., *summa cum laude*, June, 1960; M.S. (by special vote of the faculty), June 1960.
California Institute of Technology, September 1960–June 1963; Ph.D. in Mathematics, June 1963. Thesis: “Finite Semifields and Projective Planes.”

3. Employment Record

Consultant, Burroughs Corp., Pasadena, California, 1960–1968.
Assistant Professor of Mathematics, California Institute of Technology, 1963–1966.
Associate Professor of Mathematics, California Institute of Technology, 1966–1968.
Professor of Computer Science, Stanford University, 1968–.
Staff Mathematician, Institute for Defense Analyses—Communications Research Division, 1968–1969.
Guest Professor of Mathematics, University of Oslo, 1972–1973.
Professor of Electrical Engineering (by courtesy), Stanford University, 1977–.
Fletcher Jones Professor of Computer Science, Stanford University, 1977–1989.
Professor of The Art of Computer Programming, Stanford University, 1990–1992.
Professor of The Art of Computer Programming, Emeritus, Stanford University, 1993–.
Visiting Professor in Computer Science, University of Oxford, 2002–2006, 2011–2017.
Honorary Distinguished Professor, Cardiff School of Computer Science and Informatics, 2011–2016.
Theta Chi Hall of Honor, 2016–.

4. Professional Societies

American Guild of Organists, 1965–.
American Mathematical Society, 1961–.
 Committee on Composition Technology, 1978–1981.
Association for Computing Machinery, 1959–.
 Chairman, subcommittee on ALGOL, 1963–1964.
 General technical achievement awards subcommittee, 1975–1979.
 National Lecturer, 1966–1967.
 Visiting Scientist, 1966–1967.
Mathematical Association of America, 1959–.
Society for Industrial and Applied Mathematics, 1965–.

5. Publications

(see attached list)

6. Patents

- 3422405 (with Roger E. Packard) Digital computers having an indirect field length operation. January 14, 1969.
- 3454929 (with Donald P. Hynes) Computer Edit System. July 8, 1969.
- 3548174 Random number generator. December 15, 1970.
- 3626167 (with LeRoy R. Guck, Lawrence G. Hanson) Scaling and number base converting method and apparatus. December 7, 1971.
- 5305118 (with Stephen N. Schiller) Methods of controlling dot size in digital halftoning with multi-cell threshold arrays. April 19, 1994. European patent 96108227.8-2202, July 17, 1996.

7. Principal Invited Lectures Given

- ACM National Convention, Syracuse, 1962.
- NATO Summer School, Denmark, 1967.
- Britannica Scholar, Chicago, 1968.
- International Symposium on Teaching of Programming, Newcastle-Upon-Tyne, 1970.
- International Congress of Mathematicians, Nice, 1970.
- IFIP Congress, Ljubljana, 1971.
- International Congress on Logic, Methodology, and Philosophy of Science, Bucharest, 1971.
- Mathematical Association of America, San Francisco, 1974.
- The Computer Science Lecture, Carnegie-Mellon University, 1974.
- ACM National Convention, San Diego, 1974.
- Symposium on Computational Systems, Monterrey, Mexico, 1975.
- Chaire Aisenstadt, Montréal, 1975.
- American Association for the Advancement of Science, Boston, 1976; see paper P82 below.
- Gibbs Lecture (American Mathematical Society), Atlanta, 1978; see paper P91 below.
- Gillies Lectures, University of Illinois, 1979.
- Hitchcock Professor, University of California, 1979.
- Ritt Lecturer, Columbia University, 1980.
- International Colloquium on Automata, Languages, and Programming, Epidaurus, Greece, 1985; see paper Q82 below.
- 4th SIAM Conference on Discrete Mathematics, San Francisco, 1988.
- IFIP Congress, San Francisco, 1989 (keynote address); see paper P138 below.
- Organick Memorial Lectures, University of Utah, 1990.
- Donegall Lecturer in Mathematics, Trinity College, Dublin, 1992.
- International Symposium on Teaching of Programming, Newcastle-Upon-Tyne (25th Anniversary Year), 1992.
- Weizmann Memorial Lectures, Weizmann Institute of Science, 1992.
- ACM-SIAM Symposium on Discrete Algorithms, Austin, 1993.
- ATypI Congress, San Francisco, 1994.
- Unicode Conference, San José, 1995.
- Commemorative lecture for Fiftieth Anniversary of Mathematisch Centrum, Amsterdam, 1996.
- Commemorative lecture for Kyoto Prize, Kyoto, 1996.
- SIAM Annual Meeting, Stanford, 1997.
- God and Computer Lectures, MIT, 1999.
- Pascal Lectures, University of Waterloo, 2000.
- Strachey Lecture, Oxford University, 2001.
- Pi Mu Epsilon J. Sutherland Frame Lecture, San José, 2007.
- BCS/IET Turing Lectures, 2011.
- Dan E. Christie Lectures, Bowdoin College, 2011.
- Vienna Distinguished Gödel Lecture, Vienna University of Technology, 2013.
- Kailath Lecture, Stanford University, 2014.
- SIAM Annual Meeting (Von Neumann Lecture), Boston, 2016.

8. Editorial Boards

ACM Transactions on Algorithms, 2004–.
Acta Informatica, 1970–.
Advances in Mathematics, 1971–1979.
Applied Mathematics Letters, 1987–2000.
Communications of the ACM, 1966.
Combinatorica, 1985–1998.
Computers and Mathematics with Applications, 1973–2008.
Discrete Applied Mathematics, 1979.
Discrete and Computational Geometry, 1986–2012.
Discrete Mathematics, 1970–1978.
Electronic Journal of Combinatorics, 1994–2013.
Fibonacci Quarterly, 1964–1979.
Historia Mathematica, 1972–1979.
Human-Computer Interaction, 1985–1995.
IEEE Transactions on Software Engineering, 1975–1979.
Information Processing Letters, 1970–1979.
Japan Journal of Industrial and Applied Mathematics, 1997–2005.
Journal of Algorithms, 1979–2004.
Journal of Computer and Information Sciences, 1969–1979.
Journal of Computer and System Sciences, 1969–2012.
Journal of Computer Science and Technology, 1989–.
Journal of Experimental Algorithmics, 1996–.
Journal of Graph Algorithms and Applications, 1996–.
Journal of Graph Theory, 1975–1979.
Journal of Statistical Planning and Inference, 1975–1979.
Journal of the ACM, 1964–1967.
Mathematica Journal, 1990–.
The Mathematical Intelligencer, 1978–1979.
Random Structures & Algorithms, 1990–2007.
SIAM Journal on Computing, 1973–1979.
Software — Practice and Experience, 1979–2007.
Structured Programming, 1989–1993; Software Concepts and Tools, 1994–2000.
Theory of Computing, 2004–.
Utilitas Mathematica, 1970–1972.

9. Honors and Awards

Member, Pi Delta Epsilon, 1958–.
Member, Tau Beta Pi, 1958–.
Member, Blue Key, 1959–.
Case Honor Key, 1959.
Member, Sigma Xi, 1960–.
Woodrow Wilson Fellow, 1960.
National Science Foundation Fellow, 1960.
Grace Murray Hopper Award (first recipient), Association for Computing Machinery, 1971. (\$1000)
John Simon Guggenheim Fellow, 1972–1973.
Fellow, American Academy of Arts and Sciences (Class I, Section 5), 1973–.
Alan M. Turing Award, Association for Computing Machinery, 1974. (\$1000)
Member, National Academy of Sciences (Class III, Section 33 [renumbered later to Section 34]), 1975–.
Lester R. Ford Award, Mathematical Association of America, 1975. (\$100, for paper P63.)
California Institute of Technology Distinguished Alumni Award, 1978.
National Medal of Science, 1979.
W. Wallace McDowell Award, IEEE Computer Society, 1980. (\$1000)
Doctor of Science, honoris causa, Case Western Reserve University, 1980.
Distinguished Fellow, The British Computer Society, 1980.
Priestley Award, Dickinson College, 1981. (\$1000)
Member, National Academy of Engineering, 1981–.
Honorary member, IEEE, 1982–.
IEEE Computer Pioneer Award (charter recipient), 1982.
Doctor of Science, honoris causa, Luther College, 1985.
Doctor of Science, honoris causa, Lawrence University, 1985.
Golden Plate Award, American Academy of Achievement, 1985.
ACM SIGCSE Award, 1986. (\$500)
Doctor of Science, honoris causa, Muhlenberg College, 1986.
Doctor of Science, honoris causa, University of Pennsylvania, 1986.
Docteur honoris causa, University of Paris–Sud (Orsay), 1986.
ACM Software Systems Award, 1986.
Doctor of Science, honoris causa, University of Rochester, 1986.
Steele Prize for Expository Writing, American Mathematical Society, 1986. (\$4000)
Doctor of Science, honoris causa, State University of New York at Stony Brook, 1987.
The New York Academy of Sciences Award, 1987. (\$5000)
Benjamin Franklin Medal, Franklin Institute, Philadelphia, 1988.
Doctor of Science, honoris causa, Valparaiso University, 1988.
Doctor of Science, honoris causa, University of Oxford, 1988.
Doctor of Science, honoris causa, Brown University, 1988.
Doctor of Science, honoris causa, Grinnell College, 1989.
J. D. Warnier Prize, 1989. (\$3000)
Gold Medal Award, Case Alumni Association, 1990.
Doctor of Science, honoris causa, Dartmouth College, 1990.
Doctor of Science, honoris causa, Concordia University, Montréal, 1991.
Honorary Doctor of Technology, Royal Institute of Technology, Stockholm, 1991.
Associé Étranger, l'Académie des Sciences, Paris, 1992–.
Pochётный Doktor [Почётный Доктор], Saint Petersburg University, 1992.
Computer Language productivity award, 1992. (for literate programming)
Doctor of Science, honoris causa, Adelphi University, 1993.
Utenlandsk medlem, Det Norske Videnskaps-Akademi, 1993–.
Lester R. Ford Award, Mathematical Association of America, 1993. (\$250, for paper P137.)
Docteur honoris causa, University of Marne-la-Vallée, 1993.

Best New Book: Computer Science, Association of American Publishers, 1994. [Awarded for *The Stanford GraphBase*.]

ACM Fellow (charter recipient), 1994.

Adelsköld Medal, Royal Swedish Academy of Sciences, 1994.

IEEE John von Neumann Medal, 1995. (\$10,000)

Harvey Prize, Technion, 1995. (\$35,000)

Doctor Scientiæ Mathematicæ, honoris causa, Masaryk University, Brno, 1996.

Memorial Medal, Mathematics and Physics Faculty, Charles University, Prague, 1996.

Cum Deo Award (charter recipient), Milwaukee Lutheran High School, 1996.

Kyoto Prize for Advanced Technology, Inamori Foundation, 1996. (¥50,000,000)

Doctor of Science, honoris causa, Duke University, 1998.

Doctor of Science, honoris causa, St. Andrews University, Scotland, 1998.

Korrespondierendes Mitglied der Mathematisch-naturwissenschaftlichen Klasse, Bayerische Akademie der Wissenschaften, 1998–.

Fellow of The Computer History Museum, 1998–.

Doctor of Science, honoris causa, Williams College, 2000.

Doctor of Letters, honoris causa, University of Waterloo, Canada, 2000.

Minor planet “(21656) Knuth” [<http://sunk1.asu.cas.cz/~asteroid/planetky/21656/eng.htm>] named in 2001.

Epitimos Didaktor [Επίτιμος Διδάκτωρ], Athens University of Economics and Business, 2001.

Doctor of Science, honoris causa, Eberhard Karls Universität Tübingen, 2001.

Doctor Philosophiæ honoris causa, Universitetet i Oslo, 2002.

Doctor honoris causa in de Wetenschappen, Universiteit Antwerpen, 2003.

Foreign member, Royal Society of London for Improving Natural Knowledge, 2003–.

Doctor of Science, honoris causa, Harvard University, 2003.

Epitimos Didaktor [Επίτιμος Διδάκτωρ], University of Macedonia, 2003.

Doctor of Science, honoris causa, Université de Montréal, 2004.

Honorary Fellow, Magdalen College, Oxford University, 2005–.

Honorary Doctor, National Academy of Sciences, Republic of Armenia, 2005.

Doktor der Wissenschaften, honoris causa, Eidgenössische Technische Hochschule Zürich, 2005.

Honorary Doctor of Letters, Concordia University Wisconsin, 2006.

Gold Commemorable Medal, State Engineering University of Armenia, 2006.

Gold medal from Yerevan State University, 2006.

Member, Pi Mu Epsilon, 2007–.

Electronic Design’s Engineering Hall of Fame, 2007.

Docteur honoris causa, University of Bordeaux 1, 2007.

Foreign member, Russian Academy of Sciences [Rossiïskarâ Akademiâ Nauk], 2008–.

SIAM Fellow (charter recipient), 2009.

Katayanagi Prize for Research Excellence, 2010 (\$10,000).

Doctor of Science, honoris causa, University of Glasgow, 2011.

ABACUS Award, Upsilon Pi Epsilon, 2011 (\$5,000).

2010 Frontiers of Knowledge Award in Information and Communication Technologies, BBVA Foundation, 2011 (€400,000).

Stanford Engineering Hero, 2011.

IET Faraday Medal, 2011.

Ausbildungs- und Beratungszentrum für Informatikunterricht Platinum Gold Medal of Eidgenössische Technische Hochschule Zürich for Computer Science and Computer Science Education, 2012.

Member, American Philosophical Society (Class 1), 2012–.

American Mathematical Society Fellow (charter recipient), 2013.

Dr. Peter Karow Award for Font Technology and Digital Typography, 12 October 2013.

Doctor of Science, honoris causa, National University of Ireland, 2015.

Honorary Member, London Mathematical Society, 2015–.

Trotter Prize in Information, Complexity, and Inference, Texas A&M University, 2018 (\$5,000).

Distinguished Alumni Award, Case Western Reserve University Alumni Association, 2020.

10. Ph.D. Students, thesis titles, and year of graduation

Wayne Theodore Wilner, "Declarative Semantic Definition," 1971.
Clark Allan Crane, "Linear Lists and Priority Queues as Balanced Binary Trees," 1972.
Isu Fang, "FOLDS, A Declarative Formal Language Definition System," 1972.
Michael Lawrence Fredman, "Growth Properties of a Class of Recursively Defined Functions," 1972.

Publications of Donald E. Knuth

1. Books

- The Art of Computer Programming*, Vol. 1: *Fundamental Algorithms* (Reading, Mass.: Addison–Wesley, 1968), xxii + 634 pp. Second printing, revised, July 1969.
- Second edition, completely revised, December 1973. Second printing, revised, February 1975.
- Third edition, completely revised, May 1997, originally xx + 650 pp.; xx + 652 pp. since 2011.
- Volume 1, Fascicle 1: *MMIX: A RISC Computer for the New Millennium* (Upper Saddle River, N.J.: Addison–Wesley, 2005), v + 134 pp.
- Romanian translation, by Adrian Davidoviciu, Adrian Petrescu, Smaranda Dimitriu, and Paul Zamfirescu, *Tratat de programarea calculatoarelor*, V. 1: *Algoritmi fundamentali* (Bucharest: Editura tehnică, 1974), 676 pp.
- Romanian translation of the third edition, by Mihaela Târpa, *Arta programării calculatoarelor*, V. 1: *Algoritmi fundamentali* (Bucharest: Editura Teora, 2002), 616 pp.
- Romanian translation of Volume 1, Fascicle 1, by Ioan Bledea: *MMIX: Un calculator RISC pentru noul mileniu* (Bucharest: Editura Teora, 2005), ix + 149 pp.
- Russian translation, by Galina P. Babenko and Í. M. Bařakovskii, edited by K. I. Babenko, and V. S. Štarkman, *Iskusstvo programmirovaniã dlã ÉVM*, T. 1: *Osnovnye algoritmy* (Moscow: Mir, 1976), 735 pp.
- Russian translation of the third edition, under direction of Í. V. Kozachenko, by S. G. Trigub, Í. G. Gordienko, and I. V. Krasikov, edited by S. N. Trigub, *Iskusstvo programmirovaniã*, T. 1: *Osnovnye algoritmy* (Moscow: Vil’iams, 2000), 713 pp.
- Russian translation of Volume 1, Fascicle 1, by Yu. G. Gordienko, edited by S. N. Trigub, *MMIX — RISC-komp’iuter dlã novogo tysãcheletiã* (Moscow: Vil’iams, 2007), 151 pp.
- Japanese translation, under direction of Takakazu Simauti, in two volumes: Chapter 1, by Ken Hirose, *Kihon Sampō / Kiso Gainen* (Tokyo: Saiensu-Sha, 1978), 22 + 331 pp.; Chapter 2, by Nobuo Yoneda and Katsuhiko Kakehi, *Kihon Sampō / Jōhō Kōzō* (Tokyo: Saiensu-Sha, 1978), 8 + 373 pp.
- Japanese translation of the third edition, by Takashi Aoki, Kazuhiko Kakehi, Ken-Ichi Suzuki, and Takahiro Nagao, supervised by Makoto Arisawa and Eiiti Wada (Tokyo: ASCII Corporation, 2004), xxii + 632 pp. Republished in softcover (Tokyo: ASCII DWANGO, 2015).
- Japanese translation of Volume 1, Fascicle 1, by Takashi Aoki, supervised by Makoto Arisawa and Eiiti Wada (Tokyo: ASCII Corporation, 2006), vii + 134 pp.
- Chinese translation, by Guan JiWen and Su Yunlin, *Ji Suan Ji Cheng Xu She Ji Ji Qiao*, 1. Juan: *Ji Ben Suan Fa* (Beijing: Defense Industry Publishing Co., 1980), 14 + 573 pp.
- Chinese translation of the third edition, by Su YunLin, *Jisuanji Chengxu Sheji Yishu*, 1. Juan: *Jiben Suanfa* (Beijing: National Defense Industry Press, 2002), xx + 625 pp.
- Chinese translation of the third edition, by Li Bomín, Fan Ming, and Jiang Aijun, *Jisuanji Chengxu Sheji Yishu*, 1. Juan: *Jiben Suanfa* (Beijing: Posts & Telecom Press, 2016), xv + 517 pp.
- Spanish translation, by Michel Antscherl Harlange and Joan Lluís i Biset, under direction of Ramón Puigjaner i Trepát, *El Arte de Programar Ordenadores*, V. 1: *Algoritmos Fundamentales* (Barcelona: Reverté, 1980), xxiii + 672 pp.
- Indian Student Edition, with an introduction by P. C. P. Bhatt (New Delhi: Narosa Publishing House, 1985).
- Hungarian translation, under direction of Miklós Simonovits, *A Számítógép-Programozás Művészete*, V. 1: *Alapvető Algoritmusok* (Budapest: Műszaki Könyvkiadó, 1987), 654 pp.
- Hungarian translation of Volume 1, Fascicle 1, by Péter Burcsi and Zoltán Csörnyei, under direction of Antal Iványi, *MMIX: RISC számítógép a következő évezredre* (Budapest: Antoncom Infokommunikációs, 2009), 168 pp.
- Polish translation of the third edition, by Grzegorz Jakacki, *Sztuka Programowania*, Tom 1: *Algorytmy Podstawowe* (Warsaw: Wydawnictwa Naukowo-Techniczne, 2002), xxiv + 679 pp.
- Polish translation of Volume 1, Fascicle 1, by Grzegorz Jakacki, *MMIX — komputer na nowe tysiąclecie* (Warsaw: Wydawnictwa Naukowo-Techniczne, 2008), xii + 146 pp.
- Korean translation of the third edition, by Ryu Gwang (Seoul: Hanbit Media, 2006), 793 pp.

- Czech translation of the third edition, by David Krásenský, *Umění programování*, 1. díl, *Základní algoritmy* (Brno: Computer Press, 2008), xx + 649 pp.
- German translation of the third edition (Heidelberg: Springer), in preparation.
- Greek translation of the third edition, by Manos Roumeliotis and Stavros Souravlas, *Η τέχνη του προγραμματισμού* (Athens: Tziolas, 2010), 751 pp.
- Macedonian translation of the third edition (Skopje: Prosvetno Delo), in preparation.
- Albanian translation of the third edition, *Arti i programimit kompjuterik* (2010), 960 pp.
- The Art of Computer Programming*, Vol. 2: *Seminumerical Algorithms* (Reading, Mass.: Addison–Wesley, 1969), xii + 624 pp. Second printing, revised, November 1971.
- Second edition, completely revised, January 1981, xiv + 689 pp.
- Third edition, completely revised, September 1997, originally xiv + 762 pp.; xiv + 764 pp. since 2011.
- Russian translation, by Galina P. Babenko, É. G. Belaga, and L. V. Maïorov, edited by K. I. Babenko, *Iskusstvo programmirovaniâ dlâ ÉVM*, T. 2: *Poluchislennye algoritmy* (Moscow: Mir, 1977), 724 pp.
- Russian translation of the third edition, under direction of Î. V. Kozachenko, by L. F. Kozachenko, V. T. Tertyshnyi, and I. V. Krasikov, edited by S. N. Trigub, *Iskusstvo programmirovaniâ*, T. 2: *Poluchislennye algoritmy* (Moscow: Vil'iams, 2000), 830 pp.
- Japanese translation, under direction of Takakazu Simauti, in two volumes: Chapter 3, by Masaaki Sibuya, *Jun Suchi Sampō / Ransū* (Tokyo: Saiensu-Sha, 1982), ii + 259 pp.; Chapter 4, by Keisuke Nakagawa, *Jun Suchi Sampō / Sanjutsu Enzan* (Tokyo: Saiensu-Sha, 1986), xii + 536 pp.
- Japanese translation of the third edition, by Hiroaki Saito, Takahiro Nagao, Shogo Matsui, Takao Matsui, and Hitoshi Yamaushi, supervised by Makoto Arisawa and Eiiti Wada (Tokyo: ASCII Corporation, 2004), xvi + 725 pp. Republished in softcover (Tokyo: ASCII DWANGO, 2015).
- Romanian translation, by Florian Petrescu, Ioan Georgescu, Rolanda Predescu, and Paul Zamfirescu, *Tratat de programarea calculatoarelor*, V. 2: *Algoritmi seminumerici* (Bucharest: Editura tehnică, 1983), 722 pp.
- Romanian translation of the third edition, by Mihaela Târpa, Cora Radulian, and Mihai Iosif, *Arta programării calculatoarelor*, V. 2: *Algoritmi seminumerici* (Bucharest: Editura Teora, 2002), 663 pp.
- Spanish translation, *Algoritmos seminuméricos*, in preparation (Barcelona: Reverté).

- Selected Papers on Computer Languages* (Stanford, California: Center for the Study of Language and Information, 2003), xvi + 594 pp. (CSLI Lecture Notes, no. 139.)
- Selected Papers on Design of Algorithms* (Stanford, California: Center for the Study of Language and Information, 2010), xvi + 453 pp. (CSLI Lecture Notes, no. 191.)
- Selected Papers on Fun and Games* (Stanford, California: Center for the Study of Language and Information, 2011), xvii + 741 pp. (CSLI Lecture Notes, no. 192.)
- French translation, by Patrick Cégielski, of selections from all eight *Selected Papers* volumes, *Algorithmes* (Paris: Société mathématique de France, 2011), xvi + 371 pp. (CSLI Lecture Notes, no. 190.) *Éléments pour une histoire de l'informatique* (Paris: Société mathématique de France, 2011), xiv + 510 pp. (CSLI Lecture Notes, no. 194.)
- Companion to the Papers of Donald Knuth* (Stanford, California: Center for the Study of Language and Information, 2011), xiii + 441 pp. (CSLI Lecture Notes, no. 202.)
- French translation, by Patrick Cégielski, of chapters 3–19, *Knuth par Knuth* (Stanford, California: Center for the Study of Language and Information, 2020), xvi + 210 pp.
- (with Andrea Gilbert, Bram Cohen, Ed Pegg, Jr., Erich Friedman, Harry Nelson, Helen Grabarchuk, Peter Grabarchuk, Richard Candy, Serhiy Grabarchuk, Shelly Hazard, and Tanya Grabarchuk) *Puzzle Box 1* (Mineola, New York: Dover Publications, 2016), 96 pp.
- (with Andy Parr, Ed Pegg, Jr., Gianni Sarcone, Erich Friedman, Hasan Yurtoglu, Helen Grabarchuk, Richard Candy, Shelly Hazard, Peter Grabarchuk, Serhiy Grabarchuk, and Tanya Grabarchuk) *Puzzle Box 2* (Mineola, New York: Dover Publications, 2017), 96 pp.
- (with Ali Kiliç, Andrea Gilbert, Dennis Shasha, Ed Pegg, Jr., Erich Friedman, Harry Nelson, Helen Grabarchuk, Peter Grabarchuk, Serhiy Grabarchuk, Shelly Hazard, and Tanya Grabarchuk) *Puzzle Box 3* (Mineola, New York: Dover Publications, 2017), 96 pp.
- Fantasia Apocalyptica*. Organ score, downloadable as 23 separate PDF files from <http://cs.stanford.edu/~knuth/fant.html>, 64 pp.
- (with Duane R. Bibby) *Fantasia Apocalyptica Illustrated*. (Stanford, California: Center for the Study of Language and Information, 2018), viii + 255 pp.

2. Videos and Audiotapes

Problem Solving with Donald Knuth. The Stanford Video Journal, Vol. 1 (Stanford, California: Stanford Instructional Television Network, 1985). Twenty 75-minute tapes.

“The Literate Mathematician,” in BBC Radio 5’s series *Maths Miscellany*, produced by John Jaworski and Giselle Corbett (first broadcast February 21, 1993), 30 min. Cassettes available from BBC OUPC, Walton Hall, Milton Keynes, MK7 6BH, England.

“Computer Musings: The associative law, or The anatomy of rotations in binary trees,” *The Distinguished Lecture Series 7* (Stanford, CA: University Video Communications, 1993), 68 min.

“Graph drawing from a user’s perspective,” opening lecture at the conference on Graph Drawing at MSRI, Berkeley, 18 September 1996. [<http://www.msri.org/publications/ln/msri/1996/graph/knuth/1/>]

“Some research problems for combinatorialists,” lecture at MSRI, Berkeley, 27 January 1997. [http://www.msri.org/publications/ln/msri/1997/non_workshop/knuth/1/]

Donald Knuth: God and Computers, seven public lectures delivered at MIT in the fall of 1999. [http://technetcast.ddj.com/tnc_program.html?program_id=50]

Donald Knuth: MMIX, A RISC Computer for the New Millennium, a lecture to the Boston chapter of ACM on 15 December 1999. [http://technetcast.ddj.com/tnc_play_stream.html?stream_id=199]

All Questions Answered, talk at Oslo Institute for Informatics, 30 August 2002. [<http://www.ifi.uio.no/foredrag/knuth-2002.html>]

Bottom-Up Education; or, The Search for Intelligent Life in the University, keynote speech at ITiCSE 2003, Thessaloniki, 2 July 2003. [<http://iticse2003.uom.gr/>]

“Donald Knuth: Founding Artist of Computer Science,” profile/interview on National Public Radio by David Kestenbaum, *Morning Edition* (14 March 2005). [<http://www.npr.org/templates/story/story.php?storyId=4532247>]

Donald Knuth: My Life Story, a DVD-ROM produced by Peoples Archive (2007); 97 segments, totalling 442 minutes. [<http://www.peoplesarchive.com/browse/movies/6895/>] [these stories can now be viewed at <http://www.webofstories.com/play/17060>]

Computer Musings by Professor Donald E. Knuth, a collection of Stanford lectures that are available online. [<http://scpd.stanford.edu/free-stuff/engineering-archives/donald-e-knuth-lectures>]

[Dozens of further videos of lectures are now on the internet; in 2004 or so, I stopped trying to list them.]

3. Papers (* means written by coauthor)

- P1.** The potrzebie system of weights and measures. *MAD Magazine* **1**, 33 (June 1957), 36–37. (Illustrated by Wallace Wood.) Reprinted in *Like, MAD* (New York: Signet Pocket Books No. S1838, 1960), 139–145. Page 36 reprinted in *Completely MAD* by Maria Reidelbach (Boston, Mass.: Little, Brown, 1991), 191. Reprinted with an addendum as Chapter 1 of *Selected Papers on Fun and Games* (see under Books).
- P2.** RUNCIBLE — Algebraic translation on a limited computer. *Communications of the ACM* **2**, 11 (November 1959), 18–21. Reprinted with amendments as Chapter 21 of *Selected Papers on Computer Languages* (see under Books).
- P3.** An imaginary number system. *Communications of the ACM* **3** (April 1960), 245–247. Errata, *Communications of the ACM* **4** (August 1961), 355. Reprinted as Chapter 18 of *Selected Papers on Discrete Mathematics* (see under Books).
- *P4.** (with R. C. Bose, I. M. Chakravarti) On methods of constructing sets of mutually orthogonal latin squares using a computer. Part I: *Technometrics* **2** (1960), 507–516. Part II: *Technometrics* **3** (1961), 111–117.
- P5.** Minimizing drum latency time. *Journal of the ACM* **8** (April 1961), 119–150. Reprinted with an addendum as Chapter 28 of *Selected Papers on Design of Algorithms* (see under Books).
- P6.** (with Jack N. Merner) ALGOL 60 *Confidential*. *Communications of the ACM* **4** (June 1961), 268–272. Reprinted as Chapter 4 of *Selected Papers on Computer Languages* (see under Books).
- P7.** (with G. A. Bachelor, J. R. H. Dempster, J. Speroni) SMALGOL-61. *Communications of the ACM* **4** (November 1961), 499–502. Reprinted as Chapter 5 of *Selected Papers on Computer Languages* (see under Books).
- P8.** Euler’s constant to 1271 places. *Mathematics of Computation* **16** (1962), 275–281. Reprinted with an addendum as Chapter 26 of *Selected Papers on Design of Algorithms* (see under Books).
- P9.** Evaluation of polynomials by computer. *Communications of the ACM* **5** (December 1962), 595–599. Reprinted with an addendum as Chapter 27 of *Selected Papers on Design of Algorithms* (see under Books).
- P10.** A history of writing compilers. *Computers and Automation* **11**, 12 (December 1962), 8–18. Reprinted in *Compiler Techniques*, Bary W. Pollack, ed., (Princeton: Auerbach, 1972), 38–56. Reprinted as Chapter 20 of *Selected Papers on Computer Languages* (see under Books). French translation by Patrick Cégielski in *Éléments pour une histoire de l’informatique* (see under Books), 179–198.
- P11.** Computer-drawn flowcharts. *Communications of the ACM* **6** (September 1963), 555–563. Reprinted as Chapter 22 of *Selected Papers on Computer Languages* (see under Books).
- P12.** Length of strings for a merge sort. *Communications of the ACM* **6** (November 1963), 685–688. Reprinted with additional material as Chapter 14 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P13.** Transcendental numbers based on the Fibonacci sequence. *Fibonacci Quarterly* **2** (1964), 43–44, 52. Reprinted with an addendum as Chapter 15 of *Selected Papers on Fun and Games* (see under Books).
- P14.** Billiard balls in an equilateral triangle. *Recreational Mathematics Magazine* #14 (January–February 1964), 20–23. Reprinted with an addendum as Chapter 9 of *Selected Papers on Fun and Games* (see under Books).
- P15.** (with L. L. Bumgarner, D. E. Hamilton, P. Z. Ingerman, M. P. Lietzke, J. N. Merner, D. T. Ross) A proposal for input-output conventions in ALGOL 60. *Communications of the ACM* **7** (May 1964), 273–283. Russian translation by M. I. Ageev in *Sovremennoe Programirovanie* **1** (Moscow: Soviet Radio, 1966), 73–107. Reprinted as Chapter 7 of *Selected Papers on Computer Languages* (see under Books).
- P16.** (with J. L. McNeley) SOL — A symbolic language for general-purpose systems simulation. *IEEE Transactions on Electronic Computers* **EC-13** (1964), 401–408. Reprinted as Chapter 9 of *Selected Papers on Computer Languages* (see under Books).
- P17.** (with J. L. McNeley) A formal definition of SOL. *IEEE Transactions on Electronic Computers* **EC-13** (1964), 409–414. Reprinted as Chapter 10 of *Selected Papers on Computer Languages* (see under Books).

- P18.** Representing numbers using only one 4. *Mathematics Magazine* **37** (1964), 308–310. Reprinted with an addendum as Chapter 10 of *Selected Papers on Fun and Games* (see under Books).
- P19.** (with Marshall Hall, Jr.) Combinatorial analysis and computers. *American Mathematical Monthly* **72**, part 2, *Computers and Computing*, Slaughter Memorial Papers No. 10 (February 1965), 21–28. Reprinted as Chapter 1 of *Selected Papers on Discrete Mathematics* (see under Books).
- P20.** (with J. D. Alanen) Tables of finite fields. *Sankhyā*, series A, **26** (1964), 305–328. Reprinted as Chapter 19 of *Selected Papers on Discrete Mathematics* (see under Books).
- P21.** Finite semifields and projective planes. *Journal of Algebra* **2** (1965), 182–217. Reprinted in *Neofields and Combinatorial Designs*, ed. by D. Frank Hsu, *Advances in Discrete Mathematics and Computer Science* **1** (Nonantum, Massachusetts: Hadronic Press, 1984), 57–92. Reprinted as Chapter 20 of *Selected Papers on Discrete Mathematics* (see under Books).
- P22.** A class of projective planes. *Transactions of the American Mathematical Society* **115** (1965), 541–549. Reprinted as Chapter 21 of *Selected Papers on Discrete Mathematics* (see under Books).
- P23.** On the translation of languages from left to right. *Information and Control* **8** (1965), 607–639. Russian translation by A. A. Muchnik in *Īazyki i Avtomaty*, ed. by A. N. Maslov and Ė. D. Stotskiĭ (Moscow: Mir, 1975), 9–42. Reprinted in *Great Papers in Computer Science*, edited by Phillip Laplante (St. Paul, Minnesota: West Publishing, 1996), 150–173. Reprinted as Chapter 15 of *Selected Papers on Computer Languages* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 321–356.
- P24.** Construction of a random sequence. *BIT* **5** (1965), 246–250. Reprinted as Chapter 17 of *Selected Papers on Discrete Mathematics* (see under Books).
- P25.** An almost linear recurrence. *Fibonacci Quarterly* **4** (1966), 117–128. Reprinted as Chapter 37 of *Selected Papers on Discrete Mathematics* (see under Books).
- P26.** Oriented subtrees of an arc digraph. *Journal of Combinatorial Theory* **3** (1967), 309–314. Reprinted as Chapter 12 of *Selected Papers on Discrete Mathematics* (see under Books).
- P27.** (with Thomas J. Buckholtz) Computation of tangent, Euler, and Bernoulli numbers. *Mathematics of Computation* **21** (1967), 663–688. Reprinted with an addendum as Chapter 25 of *Selected Papers on Design of Algorithms* (see under Books).
- P28.** (with Richard H. Bigelow) Programming languages for automata. *Journal of the ACM* **14** (October 1967), 615–635. Reprinted as Chapter 12 of *Selected Papers on Computer Languages* (see under Books).
- P29.** The remaining trouble spots in ALGOL 60. *Communications of the ACM* **10** (October 1967), 611–618. Reprinted in E. Horowitz, *Programming Languages: A Grand Tour* (Computer Science Press, 1982), 61–68. Reprinted as Chapter 8 of *Selected Papers on Computer Languages* (see under Books).
- P30.** A characterization of parenthesis languages. *Information and Control* **11** (1967), 269–289. Reprinted as Chapter 13 of *Selected Papers on Computer Languages* (see under Books).
- P31.** Very magic squares. *American Mathematical Monthly* **75** (March 1968), 260–264. Reprinted with an addendum as Chapter 11 of *Selected Papers on Fun and Games* (see under Books).
- P32.** Semantics of context-free languages. *Mathematical Systems Theory* **2** (1968), 127–145. Errata, *Mathematical Systems Theory* **5** (1971), 95–96. Reprinted as Chapter 17 of *Selected Papers on Computer Languages* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 357–382.
- P33.** Another enumeration of trees. *Canadian Journal of Mathematics* **20** (1968), 1077–1086. Reprinted as Chapter 13 of *Selected Papers on Discrete Mathematics* (see under Books).
- P34.** (with Peter B. Bendix) Simple word problems in universal algebras. In *Computational Problems in Abstract Algebra*, John Leech, ed. (Oxford: Pergamon, 1970), 263–297. Reprinted in *Automation of Reasoning*, edited by Jörg H. Siekmann and Graham Wrightson, **2** (Springer, 1983), 342–376. Reprinted with an addendum as Chapter 19 of *Selected Papers on Design of Algorithms* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 437–479.
- P35.** The Gamov-Stern elevator problem. *Journal of Recreational Mathematics* **2** (1969), 131–137. Reprinted with an addendum as Chapter 12 of *Selected Papers on Fun and Games* (see under Books).

- P36.** Notes on central groupoids. *Journal of Combinatorial Theory* **8** (1970), 376–390. Reprinted as Chapter 22 of *Selected Papers on Discrete Mathematics* (see under Books).
- P37.** (with Chandler Davis) Number representations and dragon curves. *Journal of Recreational Mathematics* **3** (1970), 66–81, 133–149. Reprinted with an addendum as Chapter 44 of *Selected Papers on Fun and Games* (see under Books).
- P38.** Permutations, matrices, and generalized Young tableaux. *Pacific Journal of Mathematics* **34** (1970), 709–727. Reprinted as Chapter 31 of *Selected Papers on Discrete Mathematics* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 481–502.
- P39.** A note on solid partitions. *Mathematics of Computation* **24** (1970), 955–961. Reprinted as Chapter 33 of *Selected Papers on Discrete Mathematics* (see under Books).
- P40.** Von Neumann’s first computer program. *Computing Surveys* **2** (December 1970), 247–260. Reprinted in *Papers of John von Neumann on Computing and Computer Theory*, ed. by William Aspray and Arthur Burks (Cambridge, Mass.: MIT Press, 1987), 83–96. Reprinted with corrections as Chapter 12 of *Selected Papers on Computer Science* (see under Books). French translation by Patrick Cégielski in *Éléments pour une histoire de l’informatique* (see under Books), 53–75.
- P41.** Optimum binary search trees. *Acta Informatica* **1** (1971), 14–25. Corrigenda, p. 270. Reprinted with an addendum as Chapter 4 of *Selected Papers on Design of Algorithms* (see under Books).
- P42.** (with R. W. Floyd) Notes on avoiding ‘go to’ statements. *Information Processing Letters* **1** (1971), 23–31. Errata, p. 177. Reprinted in *Writings of the Revolution*, E. Yourdon, ed. (New York: Yourdon Press, 1982), 153–162. Reprinted as Chapter 23 of *Selected Papers on Computer Languages* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 145–157.
- P43.** Subspaces, subsets, and partitions. *Journal of Combinatorial Theory (A)* **10** (1971), 178–180. Reprinted as Chapter 35 of *Selected Papers on Discrete Mathematics* (see under Books).
- P44.** The analysis of algorithms. *Actes du Congrès International des Mathématiciens 1970*, **3** (Paris: Gauthier-Villars, 1971), 269–274. Reprinted as Chapter 3 of *Selected Papers on Analysis of Algorithms* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 137–144.
- P45.** Examples of formal semantics. In *Symposium on Semantics of Algorithmic Languages*, E. Engeler, ed., *Lecture Notes in Mathematics* **188** (Berlin: Springer, 1971), 212–235. Reprinted as Chapter 18 of *Selected Papers on Computer Languages* (see under Books).
- P46.** Mathematical analysis of algorithms. *Proceedings of IFIP Congress 1971*, **1** (Amsterdam: North-Holland, 1972), 19–27. Reprinted as Chapter 1 of *Selected Papers on Analysis of Algorithms* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 107–125.
- P47.** An empirical study of FORTRAN programs. *Software—Practice and Experience* **1** (1971), 105–133. Reprinted as Chapter 24 of *Selected Papers on Computer Languages* (see under Books).
- P48.** Top-down syntax analysis. *Acta Informatica* **1** (1971), 79–110. Russian translation by Nadezhda I. V’ûikova in *Kiberneticheskii Sbornik* **15** (1978), 101–142. Reprinted as Chapter 14 of *Selected Papers on Computer Languages* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 277–320.
- P49.** (with Edward A. Bender) Enumeration of plane partitions. *Journal of Combinatorial Theory (A)* **13** (1972), 40–54. Reprinted as Chapter 32 of *Selected Papers on Discrete Mathematics* (see under Books).
- P50.** (with R. L. Graham and T. S. Motzkin) Complements and transitive closures. *Discrete Mathematics* **2** (1972), 17–29. Reprinted as Chapter 25 of *Selected Papers on Discrete Mathematics* (see under Books).
- P51.** (with N. G. de Bruijn and S. O. Rice) The average height of planted plane trees. In *Graph Theory and Computing*, R. C. Read, ed. (Academic Press, 1972), 15–22. Reprinted as Chapter 15 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P52.** (with E. B. Kaehler) An experiment in optimal sorting. *Information Processing Letters* **1** (1972), 173–176. Reprinted as Chapter 30 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P53.** Ancient Babylonian algorithms. *Communications of the ACM* **15** (July 1972), 671–677. Errata, *Communications of the ACM* **19** (February 1976), 108. Reprinted with corrections and additions as

- Chapter 11 of *Selected Papers on Computer Science* (see under Books). French translation by Patrick Cégielski in *Éléments pour une histoire de l'informatique* (see under Books), 1–20.
- P54.** George Forsythe and the development of Computer Science. *Communications of the ACM* **15** (August 1972), 721–726. Reprinted with revisions as Chapter 16 of *Selected Papers on Computer Science* (see under Books); in the first two printings it was, however, called Chapter 14.
- P55.** (with Robert W. Floyd) The Bose–Nelson sorting problem. In *A Survey of Combinatorial Theory*, Jagdish N. Srivastava, ed. (Amsterdam: North-Holland, 1973), 163–172. Reprinted with an addendum as Chapter 2 of *Selected Papers on Design of Algorithms* (see under Books).
- P56.** The dangers of computer science theory. In *Logic, Methodology, and Philosophy of Science* **4**, ed. by P. Suppes et al. (North-Holland, 1973), 189–195. Reprinted as Chapter 2 of *Selected Papers on Analysis of Algorithms* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 127–135.
- P57.** Permutations with nonnegative partial sums. *Discrete Mathematics* **5** (1973), 367–371. Reprinted as Chapter 28 of *Selected Papers on Discrete Mathematics* (see under Books).
- P58.** The triel: A new solution. *Journal of Recreational Mathematics* **6** (1973), 1–7. Reprinted with an addendum as Chapter 24 of *Selected Papers on Fun and Games* (see under Books).
- P59.** (with Jill Knuth) Mathematics and Art: The dragon curve in ceramic tile. *Journal of Recreational Mathematics* **6** (1973), 165–167. Reprinted with an addendum as Chapter 45 of *Selected Papers on Fun and Games* (see under Books).
- P60.** (with Francis R. Stevenson) Optimal measurement points for program frequency counts. *BIT* **13** (1973), 313–322. Reprinted as Chapter 5 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P61.** Wheels within wheels. *Journal of Combinatorial Theory (B)* **16** (1974), 42–46. Reprinted as Chapter 24 of *Selected Papers on Discrete Mathematics* (see under Books).
- P62.** The asymptotic number of geometries. *Journal of Combinatorial Theory (A)* **16** (1974), 398–400. Reprinted as Chapter 27 of *Selected Papers on Discrete Mathematics* (see under Books).
- P63.** Computer Science and its relation to Mathematics. *American Mathematical Monthly* **81** (April 1974), 323–343. A shorter form of this article appeared in *American Scientist* **61** (1973), 707–713; reprinted in *Computers and People* **23**, 9 (September 1974), 8–11; and in *Mathematics: People, Problems, Results*, ed. by Douglas M. Campbell and John C. Higgins, vol. 3 (Belmont, Calif.: Wadsworth, 1984), 37–47. Hungarian translation by József Pelikán in *Matematikai Lapok* **24** (1973, published 1975), 345–363. Slovenian translation by Tamara Bohte in *Obzornik za Matematiko in Fiziko* **22** (1975), 129–138, 161–167. Slovak translation (abridged) by Branislav Rován in *Pokroky Matematiky, Fiziky a Astronomie* **21** (1976), 88–96. Russian translation by Natal'ia G. Gurevich in *Sovremennye Problemy Matematiki* **11**, 12 (Moscow: Znanie, 1977), 4–32. Reprinted in part in *A Century of Mathematics Through the Eyes of the MONTHLY*, edited by John Ewing (Mathematical Association of America, 1994), 285–288. Reprinted with corrections as Chapter 1 of *Selected Papers on Computer Science* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 1–28.
- P64.** (with O. Amble) Ordered hash tables. *The Computer Journal* **17** (May 1974), 135–142. Reprinted as Chapter 7 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P65.** (with Jayme L. Szwarcfiter) A structured program to generate all topological sorting arrangements. *Information Processing Letters* **2** (1974), 153–157; erratum, **3** (1974), 64. Reprinted with revisions as Chapter 3 of *Literate Programming* (see under Books). Japanese translation by Makoto Arisawa in *Bungeiteki Programming* (see under Books), 125–133.
- P66.** (with Michael L. Fredman) Recurrence relations based on minimization. *Journal of Mathematical Analysis and Applications* **48** (1974), 534–559. Reprinted as Chapter 38 of *Selected Papers on Discrete Mathematics* (see under Books).
- P67.** Structured programming with `go to` statements. *Computing Surveys* **6** (December 1974), 261–301. Reprinted with revisions in *Current Trends in Programming Methodology*, Raymond T. Yeh, ed., **1** (Englewood Cliffs, N.J.: Prentice–Hall, 1977), 140–194; *Classics in Software Engineering*, Edward Nash Yourdon, ed. (New York: Yourdon Press, 1979), 259–321. Reprinted with “final” revisions as Chapter 2

- of *Literate Programming* (see under Books). Japanese translation by Makoto Arisawa in *Bungeiteki Programming* (see under Books), 39–123. French translation by Patrick Cégielski in *Algorithmes* (see under Books), 159–238.
- P68.** Computer programming as an art. *Communications of the ACM* **17** (December 1974), 667–673. French translation, with three supplementary paragraphs, in *L’Informatique Nouvelle*, No. 64 (July–August 1975), 20–27. Japanese translation by Makoto Arisawa in *bit* **7** (1975), 434–444; reprinted in *Kunuuusu Sensei no Program-Ron* (see under Books), 2–19; reprinted in *Bungeiteki Programming* (see under Books), 19–38. English version reprinted with the supplementary paragraphs in *ACM Turing Award Lectures: The First Twenty Years* (New York: ACM Press, 1987), 33–46; reprinted with corrections as Chapter 1 of *Literate Programming* (see under Books). Russian translation by V. V. Martynūk in *Lektsii laureatov premii T’ūringa* (Moscow: Mir, 1993), 48–64. French translation by Patrick Cégielski in *Éléments pour une histoire de l’informatique* (see under Books), 345–362.
- P69.** Estimating the efficiency of backtrack programs. *Mathematics of Computation* **29** (1975), 121–136. Reprinted as Chapter 6 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P70.** (with Ronald W. Moore) An analysis of alpha-beta pruning. *Artificial Intelligence* **6** (1975), 293–326. Reprinted as Chapter 9 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P71.** (with James H. Morris, Jr. and Vaughan R. Pratt) Fast pattern matching in strings. *SIAM Journal on Computing* **6** (1977), 323–350. Errata, see W. Rytter, *SIAM Journal on Computing* **9** (1980), 509–512. Reprinted in *Computer Algorithms: String Pattern Matching Strategies*, ed. by Jun-ichi Aoe (Los Alamitos, California: IEEE Computer Society Press, 1994), 8–35. Reprinted with an addendum as Chapter 9 of *Selected Papers on Design of Algorithms* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 395–435.
- P72.** Random matroids. *Discrete Mathematics* **12** (1975), 341–358. Reprinted as Chapter 26 of *Selected Papers on Discrete Mathematics* (see under Books).
- P73.** (with John F. Reiser) Evading the drift in floating-point addition. *Information Processing Letters* **3** (1975), 84–87. Errata, p. 164. Reprinted with an addendum as Chapter 23 of *Selected Papers on Design of Algorithms* (see under Books).

French translation by Patrick Cégielski in *Éléments pour une histoire de l'informatique* (see under Books), 199–295.
- P99.** Verification of link-level protocols. *BIT* **21** (1981), 31–36. Reprinted with an addendum as Chapter 12 of *Selected Papers on Design of Algorithms* (see under Books).
- P100.** The concept of a meta-font. *Visible Language* **16** (1982), 3–27. French translation by M. R. Delorme in *Communication et Langages* no. 55, (1983), 40–53; reprinted in *Typographie et Informatique*, proceedings of INRIA conference held 21–25 January 1985, organized by Jacques André and Patrick Sallio (Rennes, France: INRIA/IRISA – CCETT, 1985), 119–132. Reprinted as Chapter 15 of *Digital Typography* (see under Books). Russian translation in *Komp'Ûternaia Tipografiã*, 296–320 (see under Books).
- P101.** Huffman's algorithm via algebra. *Journal of Combinatorial Theory* (A) **32** (1982), 216–224. Russian translation by B. B. Pokhodzei in *Kiberneticheskii Sbornik* **22** (1985), 159–169. Reprinted as Chapter 23 of *Selected Papers on Discrete Mathematics* (see under Books).
- P102.** A permanent inequality. *American Mathematical Monthly* **88** (1981), 731–740, 798. Reprinted as Chapter 6 of *Selected Papers on Discrete Mathematics* (see under Books).
- P103.** Dynamic Huffman coding. *Journal of Algorithms* **6** (1985), 163–180. Reprinted with an addendum as Chapter 5 of *Selected Papers on Design of Algorithms* (see under Books).
- P104.** An analysis of optimum caching. *Journal of Algorithms* **6** (1985), 181–199. Reprinted as Chapter 17 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P105.** (with David R. Fuchs) Optimal prepaging and font caching. *ACM Transactions on Programming Languages and Systems* **7** (1985), 62–79. Reprinted with an addendum as Chapter 14 of *Selected Papers on Design of Algorithms* (see under Books).
- P106.** The distribution of continued fraction approximations. *Journal of Number Theory* **19** (1984), 443–448. Reprinted as Chapter 11 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P107.** An algorithm for Brownian zeroes. *Computing* **33** (1984), 89–94. Reprinted with an addendum as Chapter 21 of *Selected Papers on Design of Algorithms* (see under Books).
- *P108.** (with Michael F. Plass) Choosing better line breaks. In *Document Preparation Systems*, Nievergelt et al., eds. (Amsterdam: North-Holland, 1982), 221–242.
- P109.** Literate programming. *The Computer Journal* **27** (1984), 97–111. Reprinted with corrections as Chapter 4 of *Literate Programming* (see under Books). Japanese translation by Toshiaki Kurokawa in *bit* **17** (1985), 426–450; reprinted in *Kunuusu Sensei no Program-Ron* (see under Books), 82–128. Japanese translation by Makoto Arisawa in *Bungeiteki Programming* (see under Books), 135–182.

- P110.** Lessons learned from METAFONT. *Visible Language* **19** (1985), 35–53. Reprinted with corrections as Chapter 16 of *Digital Typography* (see under Books). Russian translation in *Komp'ûternaâ Tipografiâ*, 321–343 (see under Books).
- P111.** The toilet paper problem. *American Mathematical Monthly* **91** (1984), 465–470. Reprinted with additional material as Chapter 16 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P112.** The IBM 650: An appreciation from the field. *Annals of the History of Computing* **8** (1986), 50–55. Reprinted with corrections as Chapter 13 of *Selected Papers on Computer Science* (see under Books).
- P113.** Semi-optimal bases for linear dependencies. *Linear and Multilinear Algebra* **17** (1985), 1–4. Reprinted with an addendum as Chapter 22 of *Selected Papers on Design of Algorithms* (see under Books).
- P114.** Efficient balanced codes. *IEEE Transactions on Information Theory* **IT-32** (1986), 51–53. Reprinted in Mario Blaum, *Codes for Detecting and Correcting Unidirectional Errors* (Los Alamitos, California: IEEE Computer Society Press, 1993). Reprinted as Chapter 29 of *Selected Papers on Discrete Mathematics* (see under Books).
- P115.** (with Huang Bing-Chao) A one-way, stackless quicksort algorithm. *BIT* **26** (1986), 127–130. Reprinted with an addendum as Chapter 3 of *Selected Papers on Design of Algorithms* (see under Books).
- P116.** Digital halftones by dot diffusion. *ACM Transactions on Graphics* **6** (1987), 245–273. Reprinted with revisions as Chapter 22 of *Digital Typography* (see under Books). Russian translation in *Komp'ûternaâ Tipografiâ*, 447–468 (see under Books).
- P117.** Fibonacci multiplication. *Applied Mathematics Letters* **1** (1988), 57–60. Reprinted with an addendum as Chapter 13 of *Selected Papers on Fun and Games* (see under Books).
- *P118.** (with Christos H. Papadimitriou and John N. Tsitsiklis) A note on strategy elimination in bimatrix games. *Operations Research Letters* **7** (1988), 103–107. Errata, see Gilboa et al., *Operations Research Letters* **9** (1990), 85–89.
- P119.** A Fibonacci-like sequence of composite numbers. *Mathematics Magazine* **63** (1990), 21–25. Reprinted with an addendum as Chapter 14 of *Selected Papers on Fun and Games* (see under Books).
- P120.** (with Boris Pittel) A recurrence related to trees. *Proceedings of the American Mathematical Society* **105** (1989), 335–349. Reprinted as Chapter 39 of *Selected Papers on Discrete Mathematics* (see under Books).
- P121.** (with Herbert S. Wilf) The power of a prime that divides a generalized binomial coefficient. *Journal für die reine und angewandte Mathematik* **396** (1989), 212–219. Reprinted as Chapter 36 of *Selected Papers on Discrete Mathematics* (see under Books).
- P122.** (with Philippe Flajolet and Boris Pittel) The first cycles in an evolving graph. *Discrete Mathematics* **75** (1989), 167–215. This volume is also published as *Combinatorics 1988*, Proceedings of the Cambridge Conference in Honour of Paul Erdős, edited by Béla Bollobás (North-Holland, 1989). Reprinted as Chapter 40 of *Selected Papers on Discrete Mathematics* (see under Books).
- P123.** Efficient representation of perm groups. *Combinatorica* **11** (1991), 33–43. Reprinted with an addendum as Chapter 20 of *Selected Papers on Design of Algorithms* (see under Books).
- P124.** The errors of T_EX. *Software—Practice and Experience* **19** (1989), 607–685. Reprinted with additions and corrections as Chapters 10 and 11 of *Literate Programming* (see under Books). Japanese translation by Makoto Arisawa in *Bungeiteki Programming* (see under Books), 319–425.
- P125.** (with Hermann Zapf) AMS Euler—A new typeface for mathematics. *Scholarly Publishing* **20** (1989), 131–157. Abridged version in *ABC—XYZapf*, edited by John Dreyfus and Knut Erichson (London: Wynkyn de Worde Society, 1989), 171–179. Reprinted with corrections as Chapter 17 of *Digital Typography* (see under Books). Russian translation in *Komp'ûternaâ Tipografiâ*, 344–368 (see under Books).
- P126.** (with Robert W. Floyd) Addition machines. *SIAM Journal on Computing* **19** (1990), 329–340. Reprinted with an addendum as Chapter 10 of *Selected Papers on Design of Algorithms* (see under Books).
- P127.** (with Rajeev Motwani and Boris Pittel) Stable husbands. *Random Structures & Algorithms* **1** (1990), 1–14. Reprinted as Chapter 24 of *Selected Papers on Analysis of Algorithms* (see under Books).

- *P128. (with Richard Garfield and Herbert S. Wilf) A bijection for ordered factorizations. *Journal of Combinatorial Theory (A)* **54** (1990), 317–318.
- *P129. (with Herbert S. Wilf) A short proof of Darboux’s lemma. *Applied Mathematics Letters* **2** (1989), 139–140.
- *P130. (with Leonidas J. Guibas and Micha Sharir) Randomized incremental construction of Delaunay and Voronoi diagrams. *Algorithmica* **7** (1992), 381–413. Abbreviated version in *Automata, Languages and Programming*, edited by M. S. Paterson, *Lecture Notes in Computer Science* **443** (1990), 414–431.
- *P131. (with Lee Sallows, Martin Gardner, Richard K. Guy) Serial isogons of 90 degrees. *Mathematics Magazine* **64** (1991), 315–324.
- P132. (with Arvind Raghunathan) The problem of compatible representatives. *SIAM Journal on Discrete Mathematics* **5** (1992), 422–427. Reprinted as Chapter 33 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P133. A simple program whose proof isn’t. *Beauty Is Our Business*, edited by W. H. J. Feijen et al., a festschrift for Edsger Dijkstra (Springer, 1990), 233–242. Reprinted with an addendum as Chapter 11 of *Selected Papers on Design of Algorithms* (see under Books).
- P134. Nested satisfiability. *Acta Informatica* **28** (1990), 1–6. Reprinted with an addendum as Chapter 8 of *Selected Papers on Design of Algorithms* (see under Books).
- P135. Textbook examples of recursion. *Artificial Intelligence and Mathematical Theory of Computation*, papers in honor of John McCarthy, edited by Vladimir Lifschitz (Academic Press, 1991), 207–229. Reprinted with additional material as Chapter 22 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P136. A note on digitized angles. *Electronic Publishing—Origination, Dissemination, and Design* **3** (1990), 99–104. Reprinted as Chapter 23 of *Digital Typography* (see under Books). Russian translation in *Komp’iuternaia Tipografiia*, 469–476 (see under Books).
- P137. Two notes on notation. *American Mathematical Monthly* **99** (1992), 403–422; **102** (1995), 562. Reprinted as Chapter 2 of *Selected Papers on Discrete Mathematics* (see under Books).
- P138. Theory and practice. *Theoretical Computer Science* **90** (1991), 1–15. Also published in *Images of Programming*, dedicated to the memory of A. P. Ershov, edited by D. Bjørner and V. Kotov (Amsterdam: North-Holland, 1991), 1–15. Reprinted with corrections as Chapter 9 of *Selected Papers on Computer Science* (see under Books).
- P139. Context-free multilanguages. *Theoretical Studies in Computer Science*, edited by Jeffrey D. Ullman, a festschrift for Seymour Ginsburg (Academic Press, 1992), 1–13. Reprinted as Chapter 16 of *Selected Papers on Computer Languages* (see under Books).
- P140. (with Svante Janson, Tomasz Luczak, Boris Pittel) The birth of the giant component. *Random Structures & Algorithms* **4** (1993), 233–358. Reprinted as Chapter 41 of *Selected Papers on Discrete Mathematics* (see under Books).
- P141. Convolution polynomials. *Mathematica Journal* **2,4** (Fall 1992), 67–78. Reprinted as Chapter 15 of *Selected Papers on Discrete Mathematics* (see under Books).
- P142. Johann Faulhaber and sums of powers. *Mathematics of Computation* **61** (1993), 277–294. Reprinted as Chapter 4 of *Selected Papers on Discrete Mathematics* (see under Books).
- P143. Bracket notation for the ‘coefficient-of’ operator. *A Classical Mind*, essays in honour of C. A. R. Hoare, edited by A. W. Roscoe (Prentice–Hall, 1994), 247–258. Reprinted as Chapter 3 of *Selected Papers on Discrete Mathematics* (see under Books).
- P144. Mini-indexes for literate programs. *Software—Concepts and Tools* **15** (1994), 2–11. Reprinted as Chapter 11 of *Digital Typography* (see under Books). Russian translation in *Komp’iuternaia Tipografiia*, 235–255 (see under Books).
- P145. Two-way rounding. *SIAM Journal on Discrete Mathematics* **8** (1995), 281–290. Reprinted with an addendum as Chapter 16 of *Selected Papers on Design of Algorithms* (see under Books).

- P146.** (with Inger Johanne Håland) Polynomials involving the floor function. *Mathematica Scandinavica* **76** (1995), 194–200. Reprinted as Chapter 16 of *Selected Papers on Discrete Mathematics* (see under Books).
- P147.** Leaper graphs. *The Mathematical Gazette* **78** (1994), 274–297. Reprinted with an addendum as Chapter 43 of *Selected Papers on Fun and Games* (see under Books).
- P148.** The sandwich theorem. *Electronic Journal of Combinatorics* **1** (1994), article A1, 48 pp. Reprinted as Chapter 8 of *Selected Papers on Discrete Mathematics* (see under Books).
- P149.** An exact analysis of stable allocation. *Journal of Algorithms* **20** (1996), 431–442. Reprinted as Chapter 23 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P150.** Aztec diamonds, checkerboard graphs, and spanning trees. *Journal of Algebraic Combinatorics* **6** (1997), 253–257. Reprinted as Chapter 10 of *Selected Papers on Discrete Mathematics* (see under Books).
- P151.** Irredundant intervals. *ACM Journal of Experimental Algorithmics* **1** (1996), article 1, 19 pp. Reprinted with an addendum as Chapter 18 of *Selected Papers on Design of Algorithms* (see under Books).
- *P152.** (with David J. Jeffrey, Robert M. Corless, David E. G. Hare) Sur l’inversion de $y^\alpha e^y$ au moyen de nombres de Stirling associés. *Comptes Rendus de l’Académie des Sciences, série I*, **320** (1995), 1449–1452.
- P153.** Partitioned tensor products and their spectra. *Journal of Algebraic Combinatorics* **6** (1997), 259–267. Reprinted as Chapter 11 of *Selected Papers on Discrete Mathematics* (see under Books).
- P154.** The Knowlton–Graham partition problem. *Journal of Combinatorial Theory (A)* **73** (1996), 185–189. Reprinted as Chapter 30 of *Selected Papers on Discrete Mathematics* (see under Books).
- *P155.** (with R. M. Corless, G. H. Gonnet, D. E. G. Hare, and D. J. Jeffrey) On the Lambert W function. *Advances in Computational Mathematics* **5** (1996), 329–359.
- P156.** Overlapping Pfaffians. *Electronic Journal of Combinatorics* **3,2** (1996), paper R5, 13 pp. Reprinted in *The Foata Festschrift*, ed. by Jacques Désarménien, Adalbert Kerber, and Volker Strehl (Gap: Imprimerie Louis-Jean, 1996), 151–163. Reprinted as Chapter 7 of *Selected Papers on Discrete Mathematics* (see under Books).
- P157.** (with Svante Janson) Shellsort with three increments. *Random Structures & Algorithms* **10** (1997), 125–142. Reprinted as Chapter 25 of *Selected Papers on Analysis of Algorithms* (see under Books).
- P158.** Linear probing and graphs. *Algorithmica* **22** (1998), 561–568. Reprinted as Chapter 27 of *Selected Papers on Analysis of Algorithms* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 383–393.
- P159.** Dancing links. *Millennial Perspectives in Computer Science*, edited by Jim Davies, Bill Roscoe, and Jim Woodcock (Houndmills, Basingstoke, Hampshire: Palgrave, 2000), 187–214. Reprinted with an addendum as Chapter 38 of *Selected Papers on Fun and Games* (see under Books). French translation by Patrick Cégielski in *Algorithmes* (see under Books), 239–276.
- P160.** (with Frank Ruskey) Efficient coroutine generation of constrained Gray sequences. *From Object-Oriented to Formal Methods: Dedicated to the Memory of Ole-Johan Dahl*, edited by O. Owe, S. Krogdahl, and T. Lyche, *Lecture Notes in Computer Science* **2635** (Heidelberg: Springer-Verlag, 2004), 183–204. Reprinted as Chapter 25 of *Selected Papers on Computer Languages* (see under Books).
- P161.** (with Fan Chung and Ron Graham) A symmetric Eulerian identity. *Journal of Combinatorics* **1** (2010), 29–38.

- Q242.** *Conversations: The Essential Knuth*, an interview by Edgar G. Daylight, edited by Kurt De Grave (Heverlee, Belgium: Lonely Scholar, 2013), ii + 88 pp.
- Q243.** Problem 11685, another formula for the parity number (Thue–Morse). *American Mathematical Monthly* **120** (2013), 76; solution in **122** (2015), 81–82.
- Q244.** Solution to problems 2680, 2732, 2733, 2752, 2754. *Journal of Recreational Mathematics* **37** (2008), 78–84.
- Q245.** Problem 2853, pentasquare knight’s tour. *Journal of Recreational Mathematics* **37** (2008), 256; solution in *Topics in Recreational Mathematics 2/2015* (2015), 84–86.
- Q246.** The \TeX tuneup of 2014. *TUGboat* **35** (2014), 5–8.
- Q247.** Problem 11733, twisted fractal paths within the nonnegative integers. *American Mathematical Monthly* **120** (2013), 855; solution in **123** (2016), 98–100.
- Q248.** A footnote about ‘oh, oh, zero’. *TUGboat* **35** (2014), 232–234.
- Q249.** Problem 2860, Stanford steps. *Journal of Recreational Mathematics* **37** (2008), 352; solution in *Topics in Recreational Mathematics 3/2015* (2015), 97–98.
- Q250.** *Conversations: Algorithmic Barriers Falling: $P=NP?$* , an interview by Edgar G. Daylight, edited by Kurt De Grave (Geel, Belgium: Lonely Scholar, 2014), iii + 116 pp.
- Q251.** Failure (brief interview by Christopher Ross). *WSJ. Magazine* (April 2015), 22. Reprinted in *On Point* (New York: Black Dog & Leventhal, 2018), 303.
- Q252.** Twenty questions for Donald Knuth, to celebrate the ePublication of *TAOCP*. *TUGboat* **35** (2014), 235–243.
- Q253.** Problem 11832, square of log of Catalan function. *American Mathematical Monthly* **122** (2015), 390; solution in **124** (2017), 660–661.
- Q254.** Dedication to Hermann Zapf, 1918–2015. *The Eutypion*, 34–35 (October 2015), 2–3; *TUGboat* **36** (2015), 92.
- Q255.** Problem 11901, mappings from saturating incrementation or decrementation. *American Mathematical Monthly* **123** (2016), 399; solution in **125**, (2018), 182.
- Q256.** Problem 1994, bounded gain in an unfair game. *Mathematics Magazine* **89** (2016), 148; solution in **90** (2017), 235–236.
- Q257.** Quickie problem 1061, strange polynomial connections. *Mathematics Magazine* **89** (2016), 224, 229–230.
- Q258.** Problem 11929, dissecting a $3 \times 2n$ rectangle into equal-size pieces. *American Mathematical Monthly* **123** (2016), 831; solution in **125** (2018), 566–568.
- Q259.** Problem 11959, an identity for the permanent. *American Mathematical Monthly* **124** (2017), 179; solution in **125** (2018), 946.
- Q260.** Foreword to *New Insights From Old Programs* by Gauthier van den Hove (2019), to appear.
- Q261.** Foreword to *The MMIX Supplement* by Martin Ruckert (Upper Saddle River, N. J.: Addison–Wesley, 2015), iii–iv.
- Q262.** Computer Science as a major body of accumulated knowledge. (Transcript of impromptu remarks at the ACM 50-Year Turing Award celebration, 24 June 2017, translated into Japanese by Julien Kloetzer.) *IPSJ Magazine* **58** (Information Processing Society of Japan, 2017), 998–1004.
- Q263.** (with Alex Aiken, Edward Feigenbaum, Nils J. Nilsson, and Mehran Sahami) 50 years of innovation: Creating world-class computer science at Stanford. *Sandstone & Tile* **41, 2** (Stanford, California: Stanford Historical Society, Spring/Summer 2017), 15–25.
- Q264.** Problem 11985, some log-concave sequences. *American Mathematical Monthly* **124** (2017), 563; solution in **126** (2019), 283–284.

- Q265.** Problem 12005, tight m -by- n pavings. *American Mathematical Monthly* **124** (2017), 755; solution in **126** (2019), 660–664.
- Q266.** Native script in MathSciNet: Celebrating diversity (interview by Allyn Jackson). *Notices of the American Mathematical Society* **65**,1 (January 2018), 59–61.
- Q267.** “I’m a Lutheran” (interview by Megan Brandsrud). *Living Lutheran* **3**,9 (December 2018), 12–13. (Excerpted from <http://cs.stanford.edu/~knuth/lutheran.pdf>.)
- Q268.** Foreword to Serhiy Grabarchuk’s *Age of Puzzles: Puzzle Galleries* (San Diego, California: Puzzlium, 2019), 5.
- Q269.** Foreword to *A Book of Tasty Algorithms* (a special edition of *Azerbaijan Cuisine*) presented to participants in the 31st International Olympiad in Informatics (Baku, Azerbaijan: 2019), 0–1. (Excerpted from <http://cs.stanford.edu/~knuth/azerbaijan.pdf>.)
- Q270.** Problem 12055, conjugate partitions and multisets. *American Mathematical Monthly* **125** (2018), 660; solution in **127** (2020), 186–187.
- Q271.** Problem 12069, maximally dispersed nonattacking rooks. *American Mathematical Monthly* **125** (2018), 660; solution in **127** (2020), 379–380.
- Q272.** Donald Knuth: Programming is like nothing else. Become friends with geeks (interview by Pavel Kasik). *iDNES.cz / Magazíny*, <https://www.idnes.cz/technet/>, posted 17 October 2019.
- Q273.** Let’s not dumb down the history of Computer Science (edited by L. Shustek from my Kailath Lecture in 2014). *Communications of the ACM* **64**,2 (February 2021), 33–35.
- Q274.** Memories of Ron Graham. *Notices of the American Mathematical Society*, to appear.
- Q275.** Foreword to *The Collected Kode Vicious*, by George V. Neville-Neil (Boston: Addison–Wesley, 2020), xi–xii.
- Q276.** Contribution to *A tribute to Edsger Dijkstra*. In preparation.
- Q277.** Problem xxxxx, The googolth element of a sequence. *American Mathematical Monthly* **128** (2021), to appear.
- Q278.** The T_EX tuneup of 2021. *TUGboat* **42** (2021), to appear.
- Q279.** Interview by Toufik Mansour. *Enumerative Combinatorics and Applications* **1** (2021), to appear.
- Q280.** Contributions to Theory Dish, Stanford’s CS Theory Research Blog. theorydish.blog/2018/02/01/donald-knuth-on-doing-research/; theorydish.blog/2018/02/26/donald-knuth-on-writing-up-research/; theorydish.blog/2018/06/04/don-knuth-on-general-principles/.
