

Errata for “Semi-Supervised Learning for natural language”

Percy Liang

2014-12-26

- On page 47, equation (4.5) should read

$$L(c, c') = \sum_{d \in \mathcal{C}'} w(c \cup c', d) - \sum_{d \in \mathcal{C}} (w(c, d) + w(c', d)) + w(c, c'). \quad (1)$$

to avoid double counting $w(c, c')$ when $d \in \{c, c'\}$. Thanks to Pierre Nugues for pointing this out. Fortunately, the code was already implemented correctly.
